

Asel Turatbek Kyzy

Full-Stack Developer

Istanbul, Türkiye | +90 (542) 161 04 99 | aselturatbekk@gmail.com | [LinkedIn](#) | [Github](#)

PROFESSIONAL SUMMARY

Full-Stack Developer with practical experience building and maintaining web and mobile applications using Node.js, Express, NestJS, React, React Native, HTML, and CSS. Experienced in designing and implementing RESTful APIs, integrating frontend and backend systems, and writing unit and integration tests to deliver reliable, high-quality software. Comfortable working in Agile environments, actively participating in code reviews, and taking ownership of features from development to production. Strong communication skills in English, with a curiosity-driven mindset and a passion for building scalable, user-focused products.

EDUCATION

Bartın University – Faculty of Science | Bartın, Türkiye

B.Sc. in Computer Technology and Information Systems

2021 – 2025

GPA: 3.17 / 4.00

EXPERIENCE

Web Developer | Creative Designer & Digital Transformation

Bilimon Medya ve İletişim A.Ş.

Jul 2025 – Present | Istanbul, Türkiye (On-site)

- Developed, launched, and currently maintain a production-ready web product used as a commercial solution (Interaktif Kartvizit Platform)
- Took ownership of the full development lifecycle, from implementation and deployment to ongoing maintenance
- Built and customized web applications and WordPress websites using HTML, CSS, JavaScript, and custom frontend code
- Implemented responsive UI components aligned with product and brand requirements
- Worked in Agile workflows, collaborating with cross-functional teams on digital transformation projects
- Supported UI and product workflows using Adobe Creative Suite

Internship Trainee – Software Development

Azerion

Oct 2024 – Oct 2025 | Remote, Türkiye

- Contributed to the development of humoq.com using Next.js and Go/PostgreSQL within a microservices architecture
- Enhanced admin workflows and internal features for voidu.com
- Developed AI-powered features using OpenAI and DALL-E and wrote unit tests for thegurume.com (NestJS, MongoDB)
- Practiced Agile workflows, actively participating in daily stand-ups, sprint planning, and sprints

Full-Stack Mobile Developer – Freelance

Oct 2024 – Dec 2024 | Remote, Türkiye

- Played a leading role in developing a location-based social mobile application for media sharing, real-time chat, and booking
- Built the mobile frontend using React Native
- Developed a scalable backend with Node.js and Express
- Implemented real-time data handling, authentication, and cloud functions using Firestore
- Contributed to improving application performance, stability, and overall user experience

Russian: Upper-Intermediate (B2)

PROJECTS

Interaktif Kartvizit Platform

Full-Stack Developer

Bilimon Medya ve İletişim A.Ş. | 2025

Live Product

- Developed a production-ready interactive digital business card platform from scratch for company use
- Built a full-stack system with PHP (Laravel), MySQL, and a modern React (Vite) + Tailwind CSS web interface
- Implemented a role-based admin panel and mobile-first, fully responsive UI
- Added multi-language support, customizable UI options, and dynamic content management
- Launched and currently maintaining the platform as an actively used product
- Handled deployment and ongoing updates of the live product, regularly releasing new features and improvements

Live Demo: <https://interaktifkartvizit.com/kartvizit/663627>

MasAI – AI-Powered Storytelling App

Full-Stack Developer | TÜBİTAK 2209-A Funded

2025

- Developed a mobile application that generates personalized children's stories using AI
- Implemented backend services and RESTful APIs using NestJS
- Built mobile interfaces with React Native (JavaScript)
- Managed data storage and operations using MongoDB

EcoOil – Waste Oil Recycling App

Frontend Developer | TÜBİTAK 2209-A Funded

2023 – 2024

- Developed a mobile application for scheduling and tracking waste oil pickups
- Implemented map-based density insights for operational visualization
- Built frontend features using React Native (TypeScript)
- Integrated backend services built with Laravel and SQLite

Beauty Center Management System

Full-Stack Developer | In Development

2025 – Present

- Developing a web-based management system for beauty centers
- Implemented appointment and inventory management features
- Built backend services and RESTful APIs using Node.js and Express.js
- Designed responsive user interfaces using HTML and CSS
- Managed relational data using MySQL

Real-Time Messaging App

Full-Stack Developer

2023

- Developed a real-time web messaging application as a university project
- Built frontend components using React.js
- Implemented backend services with Node.js and Express.js
- Integrated Firebase for authentication and real-time message synchronization
